

PLUMBING FITTINGS TESTING AND CERTIFICATION SERVICES

SET YOUR MARK FOR SUCCESS.

With a solid leadership in certifying faucets and components for the plumbing industry, CSA Group provides third-party validation that products comply with a broad range of local, national and international standards and regulations. CSA Group is a leading certification organization in North America, accredited and accepted as an official testing and certification organization by: American National Standards Institute (ANSI) / Occupational Safety and Health Administration (OSHA) / Standards Council of Canada (SCC). CSA Group is also accredited by the International Electro Technical Committee as a National Certification Body in the CB Scheme.

THE CSA MARK

SHOWN AND KNOWN ON A BILLION PRODUCTS AROUND THE WORLD.

CSA Group's certification mark is credible proof that your products meet the required safety standards and of high importance to regulators, buyers, specifiers, distributors and others.

Products and components certified for Canada and US

Products certified for Canada

Products certified for US

Products certified for Canada and US

We provide the following plumbing services:

- The CSA marks – We verify that all the plumbing products and components are safe and suitable according to the relevant standards
- EPA WaterSense certification program, according to the US Environment Protection Agency requirements
- NSF 372 (California AB1953) Certification for Low Lead Content (LLC) in plumbing products
- HYDRONICS Components Certification
- PEX and plastic piping, compression fittings and push fittings certification
- Fittings certification including electrical applications, such as lights, or chromotherapy features
- DOE Conformity for low flow in fittings, according to the US Department of Energy requirements
- NSF/ANSI 61, NSF/ANSI 14 Certification and other NSF Standards, as stand-alone or in combination with hydraulic and mechanical performance standards
- SOLAR collectors and thermal solar systems certification

Our technical staff is highly qualified and have thorough knowledge of the plumbing requirements. We help manufacturers and importers verifying compliance with ANSI, IAPMO, ASTM, ASME and NSF standards and regulations and also support customers in complying with the EPA WaterSense certification program, the Low Lead program, and the most recent plumbing requirements. The global network of CSA Group provides you with local, qualified testing and certification experts who will work with you throughout the entire process.
