

WE'LL GET YOU TO NORTH AMERICA AND THE WORLD.
THE SAFER WAY.

YOUR DESTINATION
IS CLOSER THAN YOU THINK.

SETTING YOUR SIGHTS ON EXPORT OPPORTUNITIES?

Breaking into new markets can be a time-consuming and expensive process, especially when you may not be familiar with all the legal requirements.

Your products must meet many legal requirements in North America, and ensuring that your product carries a recognized safety certification mark is one of them. The certification mark from an accredited and accepted certification organization plays a key role in a purchasing decision. For buyers, distributors and marketers, it is visible and credible proof that your products meet the required safety standards.

The CSA mark is one of two major marks accepted in North America and appears on billions of products worldwide. It opens doors to the North American market because it demonstrates that your products have met the required U.S. and Canadian standards.

Products certified for

TRUST OUR EXPERTISE.

With a heritage of over 90 years in standards development, CSA Group has been helping manufacturers sell their products in global markets, as they win over customers with accepted marks of certification.

A leader in North America and around the world, CSA Group is accredited and accepted as an official testing and certification organization by the American National Standards Institute (ANSI), the Occupational Safety and Health Administration (OSHA), and the Standards Council of Canada (SCC). The standard's division of CSA Group has developed more than 3,000 safety standards for electrical, electronic, gas-fired, mechanical and plumbing products and equipment referenced in legislation throughout North America.

CSA Group has developed a reliable network of qualified partners throughout Europe. That means your domestic, commercial and industrial products can be tested and certified locally at your doorstep before embarking on a smooth ride to North America!

CSA Group is accepted and accredited by:

- American National Standards Institute (ANSI)
- Occupational Safety and Health Administration (OSHA)
- Standards Council of Canada (SCC)

THE DIRECT ROUTE IS THE SHORTEST.

ONLY FOUR STEPS TO PRODUCT CERTIFICATION.

In today's fast paced world, shortening time to market is critical. With streamlined certification services from CSA Group, you're in a better position to meet and surpass your customers' expectations. The process is easier than you may think.

- 1 Contact your local CSA Group office
- 2 Submit a product sample along with the technical drawings
- 3 Establish a tailored testing program
- 4 Receive the test report and certificate so that you can now display the CSA mark on your product

In Europe, CSA Group offers convenient local access to a knowledgeable team of experts who help smooth the certification process. Our technical staff are highly qualified and, with their thorough understanding of North American standards, can help guide you through the certification process, start to finish.

- Our **Technical Information Services** team provides a preliminary review of your prototype that will help determine the certification requirements and identify any non conformances early on in the process.
- Our **Global Market Access** team will help identify certification requirements for many international markets and give you the services you need to obtain the certification marks demanded by countries around the world.

WHY TAKE RISKS?

NOW THERE'S A SAFER ROUTE.

Certify your product with CSA Group and work deliberately towards your success.
