

# INDUSTRIAL CONTROL EQUIPMENT

## SET YOUR MARK FOR SUCCESS.

European manufactured industrial equipment has a high degree of innovative technology, reason why they are exported world-wide, including North America. However, a proof of compliance with North American standards including CSA and UL is required by your customers, distributors and local regulatory authorities. The cCSAus mark on your industrial product means that it has been tested and certified for use in both Canada and USA. From a simple fuse holder to complex manufacturing equipment, CSA Group provides the local service to test and certify your products for the international market.

## THE CSA MARK

SHOWN AND KNOWN ON A BILLION PRODUCTS AROUND THE WORLD.

CSA Group's certification mark is credible proof that your products meet the required safety standards and a visible assurance for regulators, buyers, distributors and others.

Products certified for  
Canada and US

Products certified  
for Canada

Products certified  
for US

**We certify the following products among many others:**

- Industrial control equipment (motor controllers, drives, relays, etc.)
- Wiring devices (connectors, terminal blocks, receptacles, plugs, etc.)
- Frequency converters
- Motors & generators
- Control panels
- Programmable logic controllers (PLC's)
- Renewable energy systems: windmill generators, photovoltaic systems

**We offer field certification (small batches at your location) for:**

- Control panels
- Machinery
- Motor-operated equipment

In addition to Field Certification, one of CSA Group's other flexible services is the Special Industrial Control Panel (SICP) program, offering manufacturers of control panels optimal flexibility in supplying panels of variable designs to North America. Our local technical staff has in depth knowledge of the North American standards, providing high quality service and answers to your questions in developing new products (Technical Information Service). The global network of CSA Group provides you with local qualified testing and certification experts who will work with you through the entire process.
